Question #:1

What are two use cases for employing widget configuration settings?

- A. to expose parameters that may vary between widget instances
- B. to provide an increased level of merchandiser control over widget behavior and display
- C. to determine whether a widget can be placed on a layout
- D. to provide links to 3rd party Javascript libraries

Answer: C D

Question #:2

What are two reasons to use the CC-Storage library to save data objects in local storage?

- A. to support browsers using private browsing mode
- B. to support Firefox browsers only
- C. to support Chrome browsers only
- D. to support iOS devices using Safari

Answer: A D

Question #:3

Which use case does NOT require the use of multiple sites or multiple instances?

- A. A company has stores in multiple countries and their stores only differ by the languages and currencies they support.
- B. A company wants to expand their brand to multiple countries with multiple languages and currencies. The stores sell different products and have different promotions, but share shoppers.
- C. A company has two brands with mostly different products. The brand stores have separate carts, payment gateways, and tax providers, with a unique look and feel.
- D. A company operates three distinct brands operating as separate business units with different teams. The brands share no layouts, promotions, content, products, or shoppers.

Answer: A

Question #:4

Given the example custom widget Javascript:

In order to employ the Cart view model, what should the custom widget's widget.json descriptor contain for the imports attribute?

- A. The Imports attribute should contain the value "user" because the cart view model belongs to the user.
- B. The Imports attribute is only valid for global widgets and is not relevant.
- C. The Imports attribute can be empty because the Cart view model is global.
- D. The imports attribute should contain the value "cart".

Answer: B

Question #:5

Consider this widget template snippet, which uses Knockout's containerless control flow syntax based on comment tags:

Under what condition will `Item #2` be displayed?

- A. Item #2 will never be displayed
- B. if the Product view model is available on the page
- C. Item #2 will always be displayed
- D. If the shopper has a product in his/her cart

Answer: B

Question #:6

A company has two sites. Site A is the default site and has English as the default language and German as an additional language. Site B has German as the default language. The company needs to provide metadata in

both languages.

After creating the products in English, which action can the company take to have metadata in both German and English?

- A. On the Metadata tab, add the German translations in addition to the English metadata.
- B. On the Metadata tab, overwrite the English metadata with the German translations.

- D. Switch to Site B to add the German translations for product and collection names and descriptions.
- E. Select German as the content language and enter the German translations for product and collection names and descriptions.

Answer: E

Question #:7

Given the example snippet of custom widget Javascript:

What are two correct statements about this code?

- A. Creates a new PAGE_CHANGED topic available for subscription.
- B. Uses the PubSub library to publish to a topic.
- C. Changes the page when the Inline function runs.
- D. Runs the inline function when the subscribed event fires.
- E. Uses the PubSub library to subscribe to a topic.

Answer: A B

Question #:8
