## Exam Questions 500-801

### IoT Connected Factory for Systems Engineers Exam

<https://certificationstime.com/>

The image shows a 3D product box for a PDF document. The box is primarily yellow and orange. At the top center, there is a circular seal with a scalloped edge containing the text "MONEY BACK 100% GUARANTEED" in a blue ribbon. Below this, the text "Questions & Answers PDF" is displayed in a bold, dark blue font. To the left of this text is a white icon of a document with a red Adobe PDF logo and the word "PDF" underneath. Below the main title, there is a list of five features, each preceded by a blue arrow pointing to the right: "Latest Exam Questions", "Verified Answers", "99% Success Rate", "Free 90 Days Update", and "Instant Access". At the bottom of the box, there is a grey banner with a black graduation cap icon on the left and the word "CERTIFICATIONSTIME" in a bold, black, sans-serif font on the right.

### QUESTION 1

Which three options rely on user services in an Industrial Automation Control System? (Choose three.)

- A. human machine interface
- B. safety parameters for predictable shutdown
- C. motion applications
- D. logistics applications
- E. enterprise resource planning applications

Correct Answer: ABC

### QUESTION 2

Which Connected Factory Wireless solution architecture is ideally set up for larger enterprises with a wide range of

clients and applications?

- A. Autonomous Access
- B. Workgroup Access
- C. Direct Access
- D. Unified Access
- E. Virtual Access

Correct Answer: D

### QUESTION 3

Which option is a benefit of product compliance in an industrial environment?

- A. ensures avoidance of safety hazards while operating in hazardous environments
- B. provides assurance that a product meets ergonomic standards
- C. correlates product certifications by standards bodies with governance and compliance requirements
- D. guarantees interoperability compliance with legacy components

Correct Answer: A

#### QUESTION 4

By 2020, experts cited in the Connected Factory Partner Accelerator System Engineer Training believe that how many

devices will be plugged into the Internet?

A. 800 million

B. 10 billion

C. 50 billion

D. 100 billion

Correct Answer: C

#### QUESTION 5

Which option is essential in designing a Connected Factory solution for a discrete manufacturing customer?

A. understanding the customer's business outcomes and manufacturing objectives

B. uncompromising adherence to the Cisco Smart Business Architecture

C. designing the solution so that Cisco Professional and Technical Services are required

D. ensuring that Optimization Services are required after initial implementation

Correct Answer: A

#### QUESTION 6

In which two types of deployment is FlexConnect used as a wireless solution in the Cisco Unified architecture? (Choose

two.)

A. main campus

B. branch office

C. home user

D. roaming user

E. quick and easy

Correct Answer: AB

### QUESTION 7

Which two options are architectures in the Connect Factory Wireless solution? (Choose two.)

- A. Automatic Access
- B. Unified Access
- C. Controller Access
- D. Workgroup Access
- E. Autonomous Access
- F. Silver Access
- G. Secure Access
- H. Gold Access

Correct Answer: BE

### QUESTION 8

What is the primary benefit that Cisco ecosystem partners get from Cisco?

- A. access to industrial automation customers
- B. greater intelligence into the converged industrial network
- C. opportunities to achieve Cisco Industrial Network Partner Certification
- D. advanced plant-floor machining technology

Correct Answer: B

### QUESTION 9

Which three options are issues caused by traditional Industrial Automation and Control Systems architecture? (Choose three.)

- A. diminishing talent pool of related technical expertise
- B. difficulty in procuring IACS devices
- C. limitations of legacy protocols
- D. limits on the number of industrial devices in a cell/area zone
- E. difficulty in delivering device performance data to monitors

Correct Answer: ABC

### QUESTION 10

Which three methods can a client device use to connect to a WLAN? (Choose three.)

- A. integrated wireless adapter
- B. firewall
- C. universal bridge
- D. workgroup bridge
- E. toll bridge
- F. radio

Correct Answer: ADF

### QUESTION 11

Which three options are benefits of the Connected Factory solution? (Choose three.)

- A. extensively tested, validated, and well-documented architecture
- B. end-to-end architecture
- C. superior reliability
- D. low-cost, converged industrial network solution
- E. removes the need for a security solution

Correct Answer: ABC

### QUESTION 12

With which options can you use a single SSID/VLAN configuration for a WLAN?

- A. continuously changing wireless clients
- B. multiple wired automation devices
- C. a fixed set of wireless clients using the 5 GHz radio
- D. a fixed set of wired automation devices

Correct Answer: C
