**Question: 1**

Which of the following would be the BEST solution for a systems administrator to access the graphical user environment of a Linux machine remotely?

- A. VNC
- B. KDE
- C. X11
- D. RPC

**Answer: A**

**Question: 2**

A technical support engineer receives a ticket from a user who is trying to create a 1KB file in the

/tmp directory and is getting the following error No space left on device. The support engineer checks the /tmp directory, and it has 20GB of free space.

Which of the following BEST describes a possible cause for this error?

- A. The /tmp directory is not mounted.
- B. The filesystem is formatted with a 4MB block size.
- C. the filesystem ran out of inodes.
- D. The /tmp directory has been set with an immutable attribute.

**Answer: C**

**Question: 3**

Which of the following is the BEST reason for not storing database files in the /var directory?

- A. The /var filesystem is not fast enough for database files.
- B. The number of files in /var is limited by the available inodes.
- C. Files in /var do not have strict file permissions.
- D. If log files fill up /var, it might corrupt the database.

**Answer: D**

**Question: 4**

A junior system administrator had trouble installing and running an Apache web server on a Linux server. You have been tasked with installing the Apache web server on the Linux server and resolving the issue that prevented the junior administrator from running Apache.

#### INSTRUCTIONS

Install Apache and start the service. Verify that the Apache service is running with the defaults. Typing “help” in the terminal will show a list of relevant commands. If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

```
[root@centos7]#
```

CentOS Command Prompt

- Option

```
[root@tecmin ~]#  
[root@tecmin ~]# yum install httpd  
Loaded plugins: fastestmirror, refresh-packagekit  
Setting up Install Process  
Loading mirror speeds from cached hostfile  
* base: centos.excellmedia.net  
* epel: epel.scopesky.iq  
* extras: centos.excellmedia.net  
* updates: centos-hn.viettelidc.com.vn  
Resolving Dependencies  
There are unfinished transactions remaining. You might consider running yum-comp  
lete-transaction first to finish them.

### Question: 5

An administrator receives a warning about a file system filling up, and then identifies a large file located at /tmp/largelogfile. The administrator deletes the file, but no space is recovered on the file system.

Which of the following commands would BEST assist the administrator in identifying the problem?

- A. `ls -l | grep largelogfile`
- B. `ps -ef | grep largelogfile`
- C. `pgrep largelogfile`
- D. `ps -ef | grep largelogfile`

**Answer: A**

### Question: 6

Which of the following can be used to boot a DVD from a remote device to initialize a Linux system setup on bare metal hardware as if it is a local DVD?

- A. UEFI
- B. PXE
- C. NFS
- D. GRUB

**Answer: A**

**Question: 7**

A junior administrator of a physical server receives log messages indicating the out-of-memory killer has been active. All memory slots are in use on the motherboard, but additional disk space is available. Space has been allocated for a swap file.

Which of the following should the administrator use to reduce the output of memory messages?

- A. free : swapoff / swapfile ; swapon -a
- B. mkswap /swapfile; swapon -a
- C. fallocate -l 2G /swapfile && swapon -a
- D. echo "1" > /proc/meminfo ; swapon / swapfile

**Answer: A**
