QUESTION 1

A Digital Developer noticed that cartridges in their workspace are NOT executing. The Developer confirms that the cartridges are uploaded to the B2C Commerce server connection's target version directory.

Which action potentially solves this problem?

- A. Set the active code version to use the latest compatibility mode.
- B. Remove invalid characters from the code version's name.
- C. Remove invalid characters from cartridge file and folder names.
- D. Set the server connection's target version directory to the active code version.

Correct Answer: D

QUESTION 2

A developer working on a multi-country site is asked to store country-specific data that drives the creation of a country selector. Examples of the data stored are:

Pricebook to be used

Image URL for country flag

The data used in staging also applies in production, but only for this site.

Which approach should the developer take to implement these requirements?

- A. Extend the Locale System Object to contain the custom data for each country
- B. Create a replicable, site-specific Custom Object with the custom data for each country
- C. Create a replicable, organization scope Custom Object with the custom data for each country
- D. Create site-specific content assets to store the data for each country

Correct Answer: A

QUESTION 3

A client has two B2C Commerce sites in the same instance: one for the U.S. market, the other for the European market. They offer free gift wrapping on a selection of products. For each order, five products can be wrapped in the U.S., but only three products can be wrapped in the European region.

How should a developer allow the merchant to independently adjust this number?

- A. Create a new custom preference by extending the Site Preference object type
- B. Add a new Campaign using the Online Marketing section of the Business Manager
- C. Configure a new localizable content slot with a market-specific value
- D. Select the corresponding option in the system preference for Orders

Correct Answer: C

QUESTION 4

A merchant wants customers to be able to order gift vouchers via their site. Since they can issue an unlimited number of these digital vouchers, this item should be available to sell at all times.

How can a developer use Business Manager to ensure that the gift vouchers are always available?

- A. Manually set the inventory to a high number.
- B. Check the Available to Sell (ATS) flag for the product set.
- C. Check the perpetual flag in the product inventory record.
- D. Set StockLevel = maxAllocation for the product.

Correct Answer: D

QUESTION 5

A developer adds a file named ControllerA.js in the cartridge named app_custom_new project. The design calls for this new file to extend functionality from ControllerA.js in app_custom_brand_project. The app_custom_brand_project and app_storefront_base cartridges include additional functionality that is required.

Which cartridge path meets the project requirements?

- A. app_custom_new_project:app_storefront_base:app_custom_brand_project
- B. app_custom_new_project:app_custom_brand_project:app_storefront_base
- C. app_storefront_base:app_custom_brand_project:app_custom_new_project
- D. app_custom_brand_project:app_custom_new_project:app_storefront_base

Correct Answer: B

QUESTION 6

What happens if the log file size limit is reached in custom logging?
