Cisco

Exam Questions 400-351

CCIE Wireless Written Exam

<https://certificationstime.com/>

QUESTION 1

Which two effects does TSPEC-based admission control have as it relates to WMM clients?(Choose two.)

- A. Deny clients access to the VLAN that do not support WMM.
- B. Allow access only for VoWLAN traffic when interference is detected.
- C. Enforce airtime entitlement for wireless voice applications.
- D. Ensure that call quality does not degrade for existing VoWLAN calls.
- E. Deny clients access to the WLAN if they do not comply with the TERP standard

Answer: BE

QUESTION 2

Which two IETF RADIUS attributes sent by the Cisco WLC can be used to differentiate authentication requests based on the user location?(Choose two.)

- A. RADIUS attribute [31] Calling-Station-Id
- B. RADIUS attribute [4] NAS-IP-Address
- C. RADIUS attribute [95] NAS-IPv6-Address
- D. RADIUS attribute [32] NAS-Identifier
- E. RADIUS attribute [303] Source-IP
- F. RADIUS attribute [30] Called-Station-Id

Answer: DF

Explanation:

Figure 3 - Example Authorization Policy Rules to Match Specific WLAN or AP

Authorization Policy				
Standard				
Status	Rule Name	Conditions (identity groups and other conditions)		Permissions
<input checked="" type="checkbox"/>	CWA_NSP	if Radius:Called-Station-ID ENDS_WITH :BYOD-Open		then Central_Web_Auth_NSP
<input checked="" type="checkbox"/>	CWA_Specific_AP	if Radius:Called-Station-ID STARTS_WITH 68-86-a7-ca-fe-e0		then Central_Web_Auth

QUESTION 3

You have received a new Cisco 5760 Controller and have gone through the initial startup wizard. You are now trying to add APs to the controller, but these are not joining.

Which three checks should you do next? (Choose three.)

- A. Check that the radios are not in a shutdown state.
- B. Check the country code of the controller
- C. The APs do not join the controller if the country code does not match.
- D. Check that the correct time is set on the controller.
- E. Check that option 53 has been set in the DHCP scope.
- F. Check that the controller has enough AP licenses.
- G. Check that the controller has been configured with the correct hostnam
- H. Otherwise, DNS resolution fails.

Answer: BCE

Explanation:

AP Join

Before connecting your Access Points to the network, ensure licenses and the correct time is set on the controller.

Licenses

Licenses are based on the Right-To-Use license model (per AP license price for the CTS760 controller).

You must add the AP licenses you purchased and accept the EULA before connecting your APs. This is how you can do it:

WLC5760#license right-to-use activate account 510 and T acceptEULA

Once you apply it, you can check the AP license information using the CLI:

WLC5760#show license right-to-use

300# License name Type Count Period left

1 account added 510 (before)

You can also add evaluation licenses for testing purposes:

WLC5760#license right-to-use activate account evaluation acceptEULA

For additional license information, please refer to the User Right-To-Use Licensing FAQ.

Enable Network Time Protocol (NTP) and Setup Time

NTP is very important for several features. It is mandatory to use NTP synchronization on controllers if you use any of these features—Location, SNMPv3, access point authentication, or MFP. The WLC supports synchronization with NTP using authentication.

You can setup NTP during the initial wizard configuration. To enable the NTP server use the following command:

WLC5760#config ntp server <ip_address>

Controller Time

It is important to setup the correct time on the controller so that the AP can join the controller.

WLC5760#clock set Fri mar 15 01:00:00 2018

Country Code Settings

Ensure that you have the correct Country Code set on your controller. To see the current Country Code configured on your controller, please issue the following CLI:

WLC5760#config show wireless country configured

Configured Country: US : United States

QUESTION 4

Compared to an active survey, which three types of information are lost when performing a passive survey? (Choose three.)

- A. retransmissions
- B. uplink information
- C. PHY rate
- D. RSSI
- E. TxBF
- F. SNR
- G. rogues

Answer: ABC

QUESTION 5

Which AireOS release is the first to support New Mobility on the Cisco 2504 WLC?

- A. 8.0x
- B. 8.1x
- C. 7.6x
- D. 7.4

Answer: A
